## Overview

---

Synchronize user integration is synchronizing the users register on your own website into DRM-X platform. After integration, your users just need to register and login on your website to get license for playing your contents protected by DRM-X.

DRM-X **XML Web Service** provides you with the interface that you can use to synchronize your users into DRM-X platform. All that you need to do is just to call some functions, like [AddNewUser](#) and [UpdateUser](#). You can get the details by visiting the link:

<http://3.drm-x.com/haihaisoftLicenseservice.asmx?op=UpdateUser>

## What necessary before integration?

---

### 1. DRM-X Account

You need to have one of the DRM-X Accounts including [Premier / Business Windows / Business Pro / Enterprise](#) before you integrate with your platform. DRM-X **Basic Account** users can manage its users on DRM-X.com instead.

Click the link below to see the DRM-X Account Comparison,

<http://www.drm-x.com/Fees-Compare-3.0.aspx>

### 2. User database, login page and register page.

You should setup a database or you may already have a database that can store your users' information if you want to integrate with DRM-X platform. You also need to create or modify your current user login page and register page for your users to login and register.

## Parameter Introduction

The parameter in **blue color** is required field. You can set the others into 'N/A' (means empty) or enter the correct value.

- **AdminEmail:** your login Email of DRM-X Account.
- **WebServiceAuthStr:** the Web Service Authenticate String for DRM-X web service. The value you set here must be the same with the one on your DRM-X account.

Steps to set:

1. Login your [DRM-X account](#).
2. Click the **Account Settings** in the left panel and choose the **Website Integration Preferences**, as shown in the screenshot below:

The screenshot displays the 'Account Settings' interface. On the left is a vertical navigation menu with the following items: Account Home, User Group, Rights, License Profile, Users, Reports, Account Settings (highlighted), Protect Audio/Video, and Protect Plain PDF. The main content area is titled 'Account Settings' and contains a table with two columns: 'Account Information' and 'Preferences'. The 'Preferences' column lists several options: Payment Preferences, Currency Preferences, Website Integration Preferences (highlighted with a red box), End User Settings, Manage Blacklist, Force Use Latest Player, Force Use Latest Reader, and Set Allow USB Device Acquire License.

Account Information	Preferences
Contact Information	Payment Preferences
Change Password	Currency Preferences
Notification	Website Integration Preferences
Renew Service	End User Settings
Select another package here	Manage Blacklist
	Force Use Latest Player
	Force Use Latest Reader
	Set Allow USB Device Acquire License

3. Select **Synchronize User Integration** and enter the **Web Service Authenticate String**. As shown in the screenshot below:

**Account Settings**

**Profile - Website Integration Preferences**

Integration Method: [Integration Help](#)

Synchronize user integration  Custom login page integration

Note: Synchronize user integration is synchronize your website users to DRM-X.com your user. We protect the Custom login page integration is when user acquiring license, it will pop up your website DRM login window Recommend, only for advanced users)

Please set a Web Service Authentication String for DRM-X web service (DRM-X need you provide

123456drm

4. Click the **Submit** button below and you will get the message shown on the picture below:

**Profile - Website Integration Preferences**

You have updated Website Integration Preferences successfully.

Integration Method: [Integration Help](#)

Synchronize user integration  Custom login page integration

Note: Synchronize user integration is synchronize your website users to DRM-X.com your user. We protect the password Custom login page integration is when user acquiring license, it will pop up your website DRM login window to acquire Recommend, only for advanced users)

- **GroupID:** the ID of your Group created in your DRM-X account. You can find **GroupID** value in Users Group of DRM-X Account.

ID	Group Name	Group Users	Reports
267	Basic Group	Group Users	Reports
296	Video Group	Group Users	Reports
297	PDF Group	Group Users	Reports
298	Music Group	Group Users	Reports

Note: in the code you just need to enter one Group ID, and the users signed up on your website will be added into group directly. You can manually change the group they belong to in your DRM-X account if you want.

- **UserLoginName:** the username or unique UserID in your user database.
- **UserPassword:** the Password of user in your user database.
- **UserEmail:** the Email of user in your user database.
- **UserFullName:** the Full Name of User. This parameter is option. You can leave this UserFullName parameter to blank, or just set it value to N/A.
- **Title**
- **Company**
- **Address**
- **City**
- **Province**
- **ZipCode**
- **Phone**
- **CompanyURL**
- **SecurityQuestion**
- **SecurityAnswer**

- **IP:** address of your user which acquire license. You can provide this Parameter, or input N/A.
- **Money:** the money amount of your users at DRM-X.com. By default, you can set this value to 0 or manually change the value on DRM-X. (Required field)
- **BindNumber:** the number of computers that you allow the users to login and play your content. It is a useful way to prevent your users with sharing their accounts.  
By default, you can set this value to '0', and manually change the value on DRM-X. (Required field)
- **IsApproved:** Set whether the user is approved immediately after they register. Please set "yes" if you approve user to login, otherwise set "no". The default value should be "yes"
- **IsLockedOut:** Set whether the user is locked out immediately after they register. Please set "yes" if you want to lock out user, otherwise set "no". The default value should be "no"

## **Download Sample Pages**

You can download the sample pages by clicking the link below:

[http://www.drm-x.com/download/sample\\_code\\_3.0/Synchronize\\_User\\_Integration\\_VB.zip](http://www.drm-x.com/download/sample_code_3.0/Synchronize_User_Integration_VB.zip)

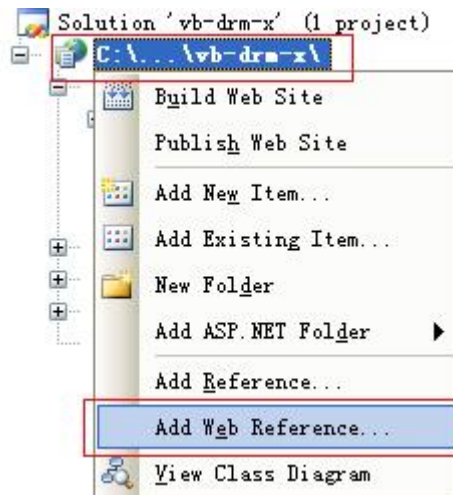

## **Step by Step Introduction**

### **Step1. Add Web References in your solution**

In Visual Studio.net 2003 or Visual Studio.net 2005, please Add Web References in Solution Explorer.

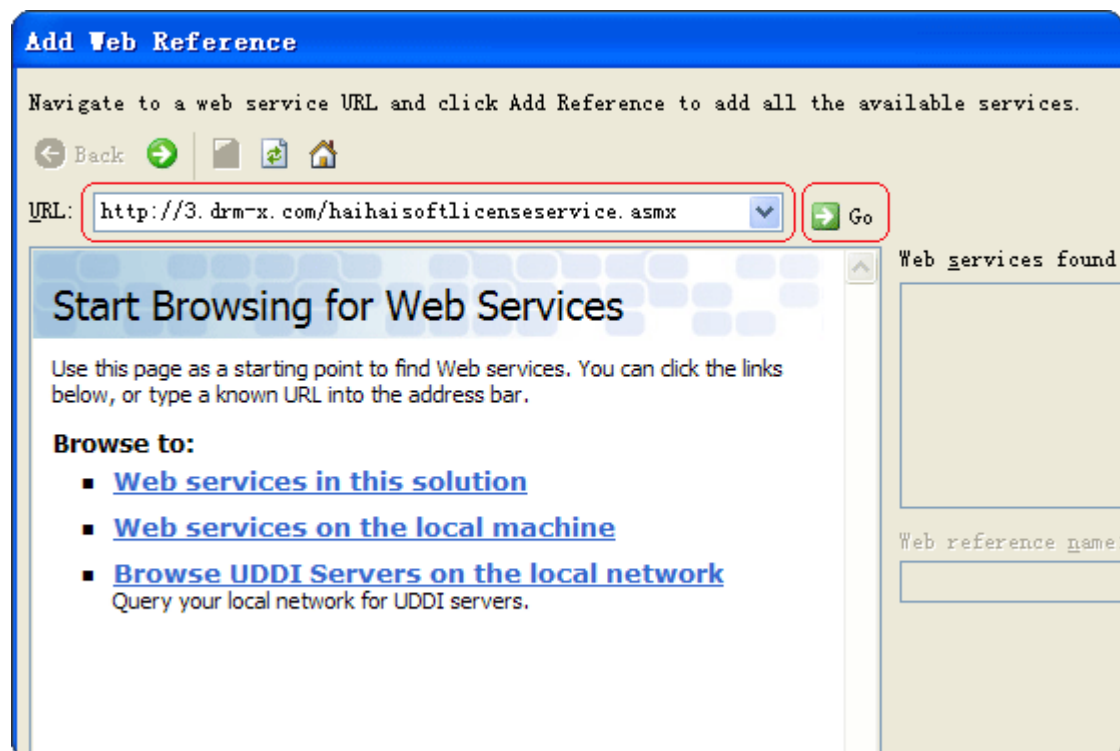

Steps to setup:

1. Right click on the **App\_webReferences** and choose the **Add Web References** in the dropdown list, shown as the screenshot below:

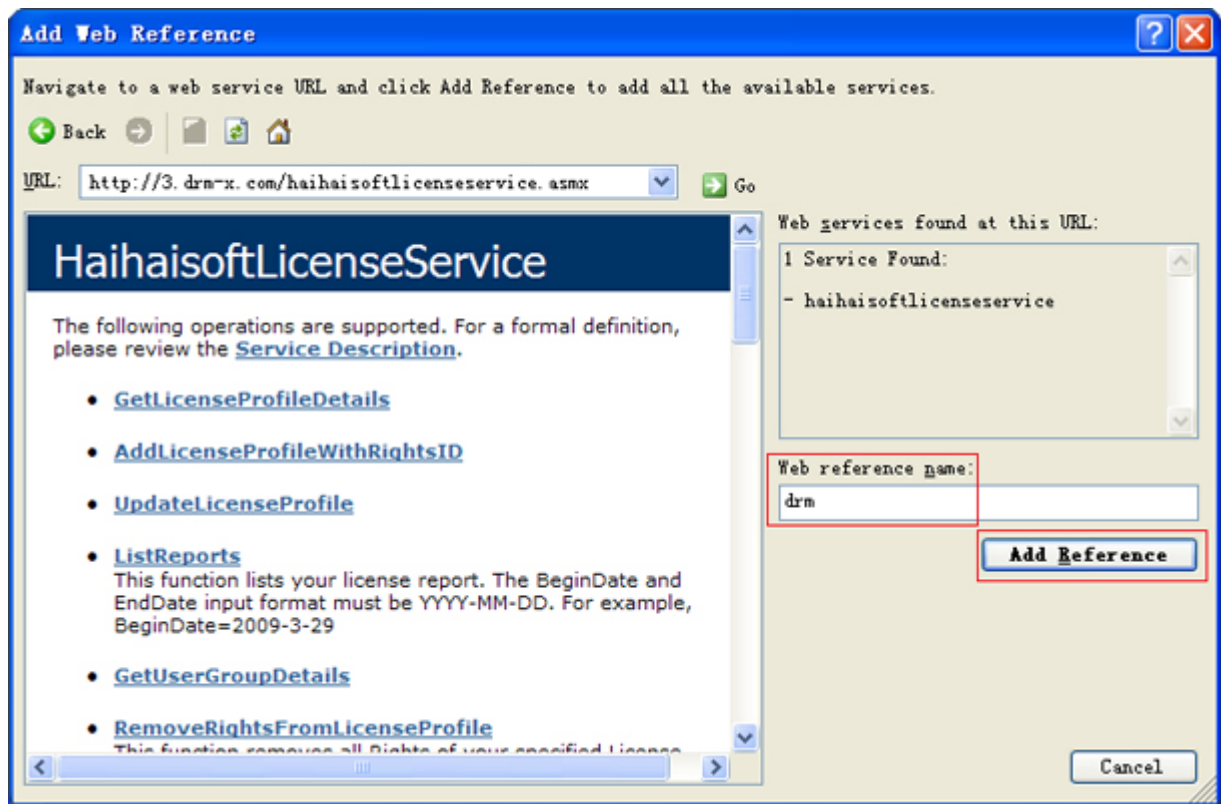

2. Input the URL of DRM-X XML Web Service:

<http://3.drm-x.com/haihaisoftlicenseservice.asmx> and click the **Go** button on the right. As shown below:

3. Rename the Web reference and click the **Add References** button on the right.

4. Added successfully

**Step2. Add the code below into your sign up page**

Here is the sample code added to register button:

Protected Sub sign\_up\_Click(ByVal sender As Object, ByVal e As System.EventArgs)  
Handles Sign\_up.Click

'XML web service Integration Settings, set No.

'When modify user information, username can not be updated, if you need user update username, you have to add a new user.

Dim DRM As New DRM\_X.HaihaisoftLicenseService

Dim AdminEmail As String = "julia.sui@haihaisoft.com"

'AdminEmail is your DRM-X account login email.

Dim WebServiceAuthStr As String = "123456"

'This value should be the same with the one on your DRM-X account panel.

Dim UserLoginName As String = Me.username.Text

'UserLoginName is the username or unique UserID in your user database.

Dim UserPassword As String = Me.password.Text

Dim UserEmail As String = "N/A"

Dim UserFullName As String = "N/A"

'UserFullName is the Full Name of User. This parameter is option. You can leave this UserFullName parameter to blank, or just set it value to N/A.

Dim GroupID As String = 89029

'GroupID is the ID of your Group that you created in your DRM-X Accounts. Your can find GroupID value in Users Group of DRM-X Accounts. If you have more than one User Group, you can create a list

'for your user to choose or you can just let them register into one user group and then separate them into different groups on your DRM-X account.

Dim Message As String

'Message is the license information, like license rights information returned from DRM-X web service.

Dim IP As String = "N/A"

Dim Money As String = "0"

Dim BindNumber As String = "0"

Dim result As String

result = DRM.AddNewUser(AdminEmail, WebServiceAuthStr, GroupID, UserLoginName, UserPassword, "N/A", "N/A", "N/A", "N/A", "N/A", "N/A", "N/A", "N/A", "N/A", "N/A", "N/A", "N/A", "N/A", Money, BindNumber, "yes", "no")

Response.Write(result)

'if you receive 1 after you click the sign up button, that means you have signed up successfully and the user has been synchronized to DRM-X account.

End Sub

#### **Step4. Run the sign up page**

Try to register a new user on the sign up page. If you receive '1', that means you have added the new user successfully on DRM-X platform already. Please check your users' database to see if the user also has been added.

#### **Step5. Play your contents protected by DRM-X**

Congratulations! Till now, the integration has been done. The users who register on your website will be synchronized into your DRM-X account either. When they open your encrypted content, they can enter their username and password in the Login window directly to get a license. They don't need to register again on DRM-X.com.

The screenshot shows a web browser window with the URL `http://3.drm-x.com/eLogin2.aspx?lang=zh`. The page header includes "Protected By DRM-X.com", a "Home" link, and a language dropdown menu. The main content area features the "DRM-X 3.0" logo and the text "Haihaisoft http://www.haihaisoft.com". Below this, it displays "Product Name: Video Packager: Basic Classes (Sample Data)" and "Please choose a license right below:". There are two radio button options: "Rent for: 3 times, 24hours, \$1" (selected) and "Rent for: 10 times, 72hours, \$2". At the bottom, there are two input fields labeled "User Name" and "Password", and two buttons: "Sign In" and "Sign up now".

## **Step6. Customize the Login page above**

You can customize the pop up login window of DRM-X. So your users can see more your company's information on it and will also make them easier to link to your website. You can set the information including your company's name, logo, website URL, and product name and so on.

If you want to customize DRM-X login page, please [read the tutorial](#)

## **Add your existed users to DRM-X.com**

For adding your existed users to DRM-X.com, you need to create a loop program to read user information from your database, and call the **AddNewUser** function to synchronize the users to DRM-X.com. In this way, you need to transfer non-encrypted password to DRM-X.com, and DRM-X will encrypt the password with strong MD5 encryption.

## **Update User Information**

Just like calling the **AddNewUser** function in your sign up page, you can also call the **UpdateUser** when they update his or her profile in your website.

Calling **UpdateUser** function is very similar with calling the **AddNewUser** function. You can read the XML web service document: <http://3.drm-x.com/haihaisoftLicenseservice.asmx?op=UpdateUser>
